

3 STEPS TO PROOF OF VALUE

ENTOUCH's goal is to help you optimize operations and reduce energy usage to drive real, measurable value and profitability.

To think through that vision, you can use a high-level, three-step process for proving value.

SELECTION

- Customer Success team works in partnership with you to review and select five to 10 sites for assessment.
- Together, we define and agree on objectives and metrics for success.

INSTALLATION

- The Customer Success team manages the installation and partners with you every step of the way.
- Rapid deployment can be complete in as few as two weeks from signing.
- Most installations are completed in one day with no operational disruption.

PROOF OF VALUE

- An assessment process kicks in, empowering insight into ROI.
- Includes weekly teleconferences on performance, comfort, issues and alerts.
- Also includes a monthly review of energy savings and system performance.
- Final Quarterly Business Review compared to initial goals and objectives.

This process helps us ensure that you've received the perfect system and plan for your unique needs.
